As Amended by House Committee on Federal

The proposal would add a new section to the Bill of Rights in the *Kansas Constitution* to create the right of the public to hunt, fish, and trap wildlife. The proposal would specify the people have the right to hunt, fish, and trap by traditional methods, subject to reasonable laws and regulations that promote wildlife conservation and management and that preserve the future of hunting and fishing. The amendment also would specify that hunting and fishing shall be the preferred means for managing and controlling wildlife, and that the amendment shall not be construed to modify any provision of law relating to trespass, property rights, or water resources.
